## Net2 access control software free

The Net2 software is designed to run a PC with Windows 8, Windows 7 or Vista operating system. It is designed to feel familiar to any Windows user. It will organize and report up to 50,000 users and 1,000 doors. There are two versions of the software: Net2 Lite which is suitable for the majority of websites and comes for free, and the Net2 Pro offers additional features for flexible and advanced access controls. Net2 Lite contains all standard access control features to manage access privileges and reports on users. Other features include unlimited free subscriber login, CCTV and basic intruder alarm integration and site graphics. The Net2 Pro has all the capabilities of Lite Net2 software with advanced features such as timetables and timelines, which are bolt-on management times, fire alarms and multi-zone intruder integrations, lockdown security, anti-passback and card designers. Net2 is a friendly and flexible Paxton user of the control network and door entry system, which is managed from the central PC. Net2 access control is easy to install and is designed to make management of any building very easy. Net2 offers a variety of IP, battery power, door entry and wireless or wired door controller to suit any site's needs, making the installer's life easier. How does Network Access Control work? The network access control system, Net2, is administered using one or more PCs and can be monitored and managed from a central location. Door controllers come as wired, wireless or powerful batteries. Net2 is designed with simplicity in mind and is easily scalable. Paxton's one-door guard philosophy means you're just quoting a door that needs access. You can build your Net2 system one door at a time using wired and wireless controllers and door entry for versatile security management and buildings. Overview software There are two versions of the software, Net2 Lite, which is suitable for most websites and free, and Net2 Pro, which offers additional features for more flexible and advanced access controls. Developed to be simple and intuitive Net2 software is very easy to learn tailor access privileges to groups or individuals quickly and easily use our intuitive, user-friendly software. Event reports can be generated in several clicks and advanced features such as site graphics, IP camera integration and triggers and further expanding the capabilities of The Overview of System Hardware All Net2 door controllers can be used alongside each other, making it easier for installers to find the best solutions for each individual Net2 site. PaxLock is a solution of wireless network access control in the door handle. It communicates wirelessly to PC servers via Net2Air bridge, reduces cable time and Net2 PaxLock will save you time on site, it can be installed quickly as it comes ready to fit into a standard Euro lock case which means it can replace the existing door handle. Net2 entry is a simple door entry system that standalone or when used with Net2 access controls, Net2 entry can be used to allow daily access for users with tokens, PIN or code. Net2 entry allows someone in the building to identify visitors via video monitor before they decide whether to give or deny entry through the outside door. The video door entry system now works in standalone mode for fast installation, easy and easy user management with our standard registration and shadow card. Offering flexible systems that can grow in line with your customers' needs and upgrade to Net2 solutions online, at no hidden costs. Due to the various website requirements, we offer a wide range of readers and keypads that are suitable for use with Net2. These include readers and keypads with vandal resistant, energy saving and long-distance capabilities. The Net2 software is designed to easily integrate with other security systems, so you can offer your customers a complete solution. By integrating with other security systems, your customers can enjoy more streamlined security for their buildings. For more information about the range, you can talk to our sales team at our Dublin office or Cork office. Дякі функції Word не відображаються в Google Документах.
